Code System Name

CS-1.0 Compressor Site Touchup System

Purpose

This coating system is to be used for touchup purposes only. This system will be used for Condition Codes 1 and 2 with adhesion test no less than 3. This is an epoxy / urethane system and will be used on items such as pipe line process piping and all exterior valve yard piping and miscellaneous structures at compressor stations.

Preparation

Hand tool cleaning by wire brush all areas of minor rust weepage or abraded surfaces.

Coating

Spot prime only all prepared surfaces with epoxy mastic primer at 2-3 mils followed by a spot finish coat of urethane at 1.5-2 mils. All coatings will be applied by brush method.
